INVITATION TO A PRESS CONFERENCE

Ladies & gentlemen, dear journalists,

The experimental « hull less » foiler Mirabaud LX has been sailing for over a year on Lake Geneva. The boat has taken the sailing community by surprise, and generated a lot of talking within the yacht racing industry.

2009 looks very promising too. Thomas Jundt - engineer and mastermind behind the Mirabaud LX - would like to introduce you to the new developments implemented over the winter or scheduled over the coming months.

The Mirabaud LX team, as well as key members of Mirabaud & Cie Banquiers Privés, therefore invites you to a press conference. Thomas Jundt will take this opportunity to explain the physical phenomena's that allow a sailing boat to fly. He will debrief the lessons from 2008, and detail the changes made towards this second season.

Date and time: Thursday, May 14, 11:00 AM

Location: Société Nautique de Genève, Port Noir

Registrations:

RSVP before May 12: media@maxcomm.ch

Subject line: Mirabaud LX
